

Lorwyn Eclipsed Report: Learned Archetypes, Bombs, and Synergies

MTGNET

July 4, 2026

Dataset Snapshot

This run uses 121,608 unique deck builds and 536,566 game rows. The unsupervised clustering stage produced 7 learned archetypes. The best-performing large shells are Golgari Elves | Scarblade Scout / Safewright Cavalry, Azorius Merfolk | Merrow Skyswimmer / Wanderbrine Preacher, Selesnya Kithkin | Timid Shieldbearer / Mistmeadow Council, which already tells us that the format is not a single monolithic color table: it separates into distinct deck families with their own signposts, core cards, and build-around incentives.

9 Bottom-Line Reading

This report treats the format as a deck ecosystem rather than a flat card ranking. The strongest cards show up in the bomb table because they win on their own. The cards that pull a cluster together show up in the build-around and dependency tables because they need a shell. The pair and anti-synergy sections then explain which combinations reinforce a winning plan and which combinations look attractive in draft but underperform together.
