

Avatar Report: Learned Archetypes, Bombs, and Synergies

MTGNET

July 4, 2026

Dataset Snapshot

This run uses 127,199 unique deck builds and 562,924 game rows. The unsupervised clustering stage produced 8 learned archetypes. The best-performing large shells are White Base Humans | Kyoshi Warriors / Avatar Enthusiasts, Izzet | Dragonfly Swarm / Firebending Lesson, Boros Humans | Treetop Freedom Fighters / Deserter's Disciple, which already tells us that the format is not a single monolithic color table: it separates into distinct deck families with their own signposts, core cards, and build-around incentives.

9 Bottom-Line Reading

This report treats the format as a deck ecosystem rather than a flat card ranking. The strongest cards show up in the bomb table because they win on their own. The cards that pull a cluster

together show up in the build-around and dependency tables because they need a shell. The pair and anti-synergy sections then explain which combinations reinforce a winning plan and which combinations look attractive in draft but underperform together.
