Reality Fracture Report: Learned Archetypes, Bombs, and Synergies

MTGNET

October 25, 2026

Dataset Snapshot

This run uses 69,846 unique deck builds and 297,964 game rows. The unsupervised clustering stage produced 11 learned archetypes. The best-performing large shells are Azorius | Desperate Futurescribe / Fatehold Charm, Dimir | Recursive Recruitment / Theorix Charm, Golgari Wolf | Primal Witchstalker / Hapatra, the Desert Fang, which already tells us that the format is not a single monolithic color table: it separates into distinct deck families with their own signposts, core cards, and build-around incentives.

9 Bottom-Line Reading

This report treats the format as a deck ecosystem rather than a flat card ranking. The strongest cards show up in the bomb table because they win on their own. The cards that pull a cluster together show up in the build-around and dependency tables because they need a shell. The pair and anti-synergy sections then explain which combinations reinforce a winning plan and which combinations look attractive in draft but underperform together.
